

Brand: BendPak

Model(s): P-9000 Surface Mount Model / P-9000 Flush-Mount Model

Description: 9,000-lb. Capacity Low-Rise Pit Lifts

Specifically designed and engineered for fast-paced auto shop environments, as well as quick oil-change facilities and home garages of any size, the P-9000 or P-9000F is easily mounted on hard flooring or installed recessed (sub-surface) in concrete floors; typically over quick-lube service pits. Convert ordinary lube pits into full wheel-service bays, and make wheel rotations and brake service a natural addition to your service capabilities. Add thousands of dollars to your profit line every month with these revolutionary pit-lifts that are loaded with standard features, including a commercial-duty 1-1/2 HP electric-hydraulic power unit, dual hydraulic cylinders, precision flow-divider, simple push-button controls and remote pneumatic safety locks. Not in the oil-change business? No problem! The P-9000 works equally great as an open-center shop or DIY lift. Install it in your home garage and transform your car port into a modern and appealing vehicle service workspace. Recess it below grade and impress your neighbors with a garage lift that magically appears then stows out of the way keeping your drive lanes free and unobstructed. Installation materials, hydraulic hoses and mounting hardware are included with each unit.

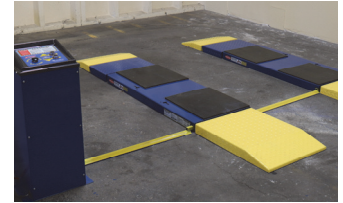

An optional lift arm kit increases versatility by increasing the contact pad reach. Features adjustable arms with stackable contact pad adapters for fast, easy and safe lifting of vehicles using manufacturer-designated lift points. With 9,000 lbs. lifting capacity, these rugged lifts will easily handle virtually every automobile, light truck and SUV. Plus, the clear-center design of both the P-9000 and P-9000F installs over your existing pit without interfering with your lube bay opening.

Model P9000F

Features:

- 9,000-lb. lifting capacity
- Easily convert fast-lube pits into wheel service work bays
- Mounts outside the pit rail without interfering with center work area
- Model P-9000F flush-mount model provides recessed drive-over option
- Heavy duty 1-1/2 HP electric-hydraulic power unit
- Electronic push-button controls allow smooth, single-hand operation
- Automatic multi-position safety locks with air release deliver safe, remote operation
- Powder-coat finish
- Durable rubber-topped pad surface and rubber lift blocks provide quick set-up
- ALI-Certified to meet strict industry and government standards
