

Brand: Ranger

Model: RWS-55TD

Description: Tire Test Tank with Built-In Wheel Lift

A Swift and Accurate Way to Pinpoint Leaks in Tires

The Ranger RWS-55TD tire and tube test tank gives technicians a swift and accurate way to pinpoint leaks in tires and wheel assemblies. The RWS-55TD tire and tube test tank minimizes time and effort searching for problem leaks in tire and wheel assemblies. Featuring a foot-operated pneumatic wheel lift, the RWS-55TD simplifies wheel handling procedures to greatly boost your productivity. Easily position tires and wheels in or out of the tank to find that leak in record time. The 500-lb. capacity tire handler lifts and pivots with only the strength of your hand, then completely submerges the entire wheel assembly into the tank, allowing for dual-side inspection.

Features

- Handles tires up to 68" in diameter, including passenger and light truck tires, super-wide tires, bus tires, coach tires, and commercial truck tires
- Allows operators to locate sidewall and tread leaks with minimal effort
- A convenient foot operated wheel lift that saves time and reduces injury
- Lifts heavy tires in and out of the tank for increased speed and efficiency
- 500-lb. capacity tire handler lifts and pivots easily by hand, then completely submerges the entire wheel assembly into the deep tank, allowing dual-side inspection
- Heavy-duty all steel construction
- Includes integrated air-source lubricator, water extractor and pressure regulator
- Includes built-in drain
- Powder coated finish
